

# GMO-free Switzerland

**GMO banned by moratorium  
(2005-2010)**

**Half time review**

## Scope of the moratorium

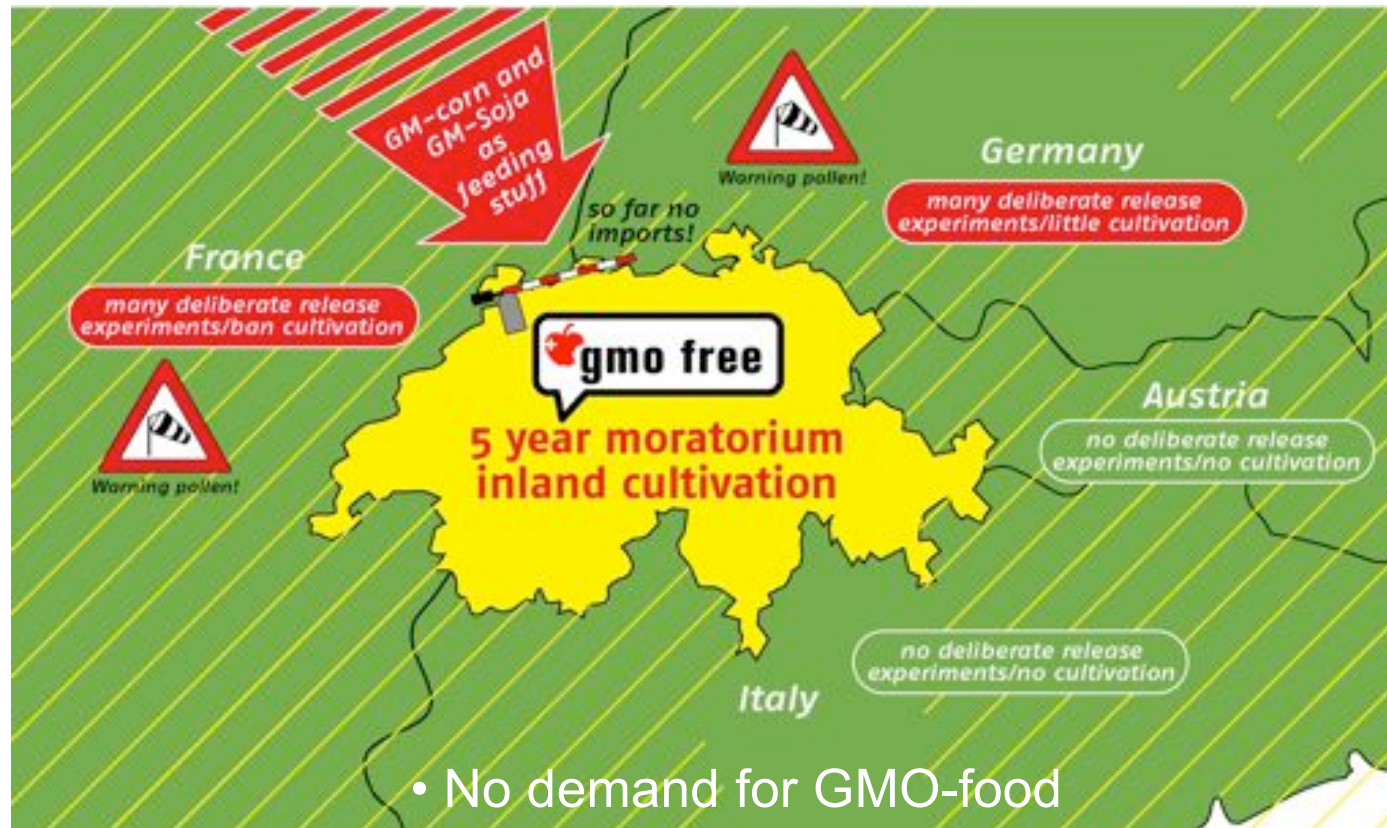

- For 5 years (Nov 2010) strictly no cultivation of GM crops (incl. no importation of GM seeds)
- Strictly no genetic modification to breed animals producing milk, meat, eggs, wool etc.
- Not subject to the moratorium: GMOs in medical health, research/field trials
- Imported food/feed: More than 99% gmo-free (regulation by approved legislation)

# Half time moratorium: it works

 **gentechfrei**

**SWITZERLAND**

- No demand for GMO-food
- No GMO produced in Switzerland nor imported
- No problems about coexistence and contamination

Next step forward

 **gentechnikfrei**

**SWITZERLAND**

Extension!

## Good reasons for prolongation

### Advantages of GMO-free food production:

- Good selling position for Swiss food marketing
- GMO-free premium export level
- GMO-free seed and feed still available on world market

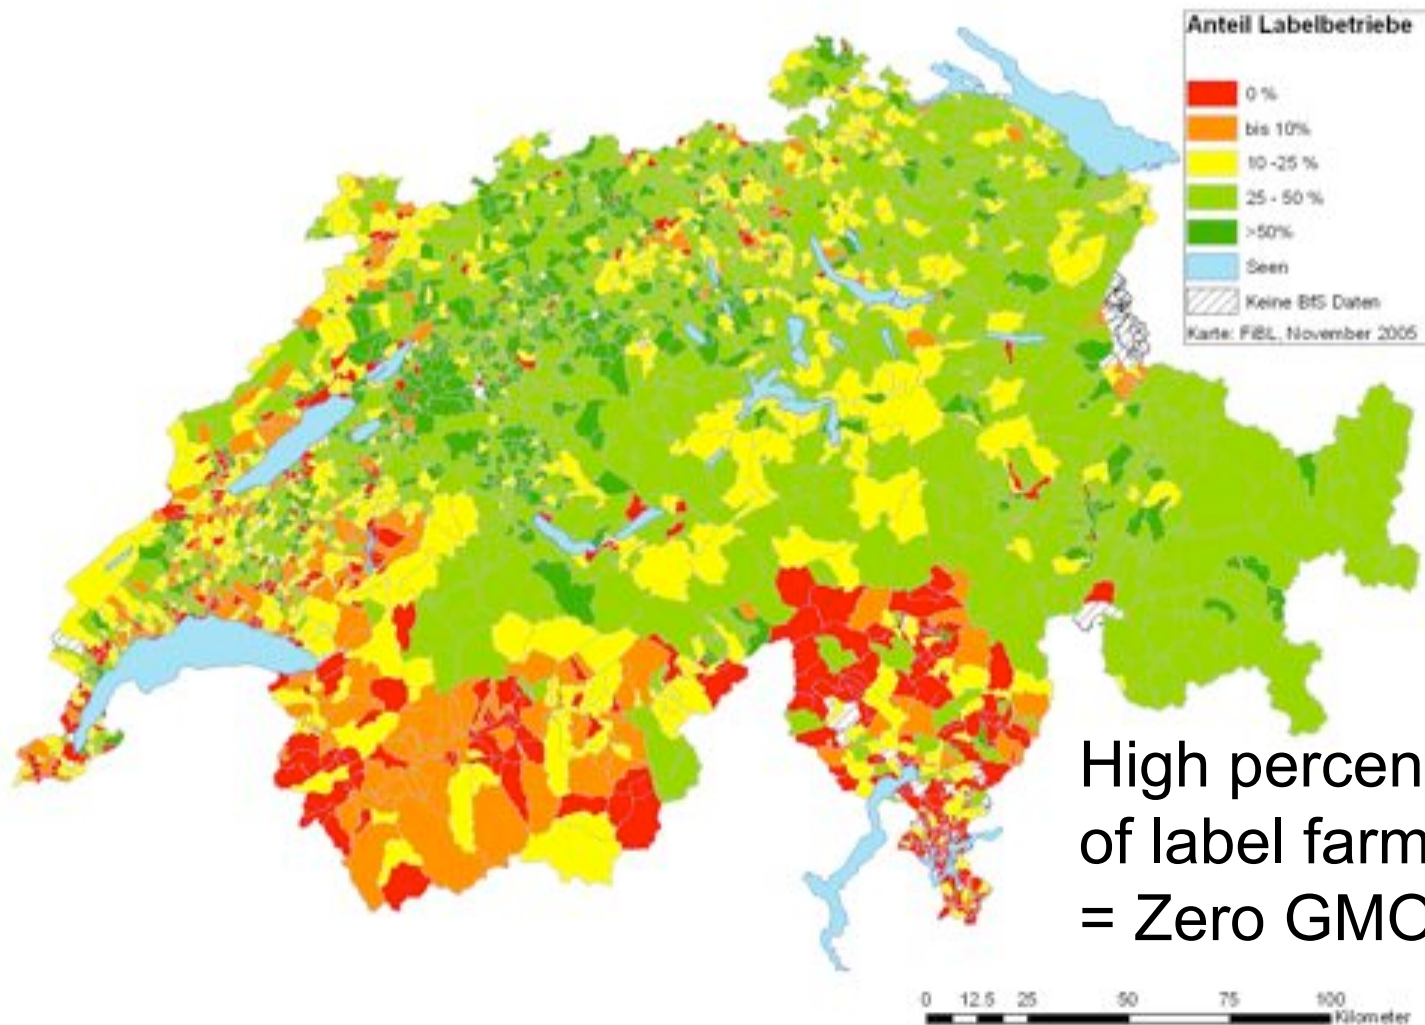

No conflicts with WTO treaty

# Coexistence? Impossible!

**gentechnikfrei**

**SWITZERLAND**

High percentage  
of label farms  
= Zero GMO tolerance

Everybody feels happy

GMO-free food: **Happy consumers in the city....**

Everybody feels happy

GMO-free food: ....happy farmers on the countryside
